

MARSH JLT SPECIALTY

OPERATIONAL INSURANCE

- Marsh in collaboration with the Swedish Windpower Association

Marsh has developed, in cooperation with the Swedish Windpower Association, an operational insurance solution which covers the assets during operation.

The Insurance

Our insurance is tailor made to fit the risk you face operating your wind turbines. Each insurance is adapted to the terms and conditions of the service and maintenance contract that applies to respective wind turbine. This means that you will have no gap in cover between service contracts and insurance, while avoiding paying for double cover in the event of overlapping service agreement and insurance.

Product Design

The insurance provides broad cover for all risk and machinery breakdown with favorable depreciation rules in the event of a damage/claim.

The insurance includes cover for business interruption for owned assets and for damage to the first not owned substation. Our product also includes liability insurance as well as legal aid insurance to protect your business as a wind power producer.

About Marsh

This insurance solution is a product of the continuous efforts to maintain Marsh as the leading risk & insurance partner for clients in the renewable energy segment. This product is unique and the latest result of the newly formed Marsh JLT specialty, following the Marsh Acquisition of JLT.
