## Excellence no matter the make

Erik Eriksson & Susana Rojas

5<sup>th</sup> of May 2022

## +40 years of experience in numbers

**>120 GW**  
Globally installed

**82 GW**  
Under service

Active in aprox  
**60 countries**

**26k** ( where 8k in  
service)  
Employees

True global, modern  
and scalable footprint

Flexibility and different  
kinds of contracts

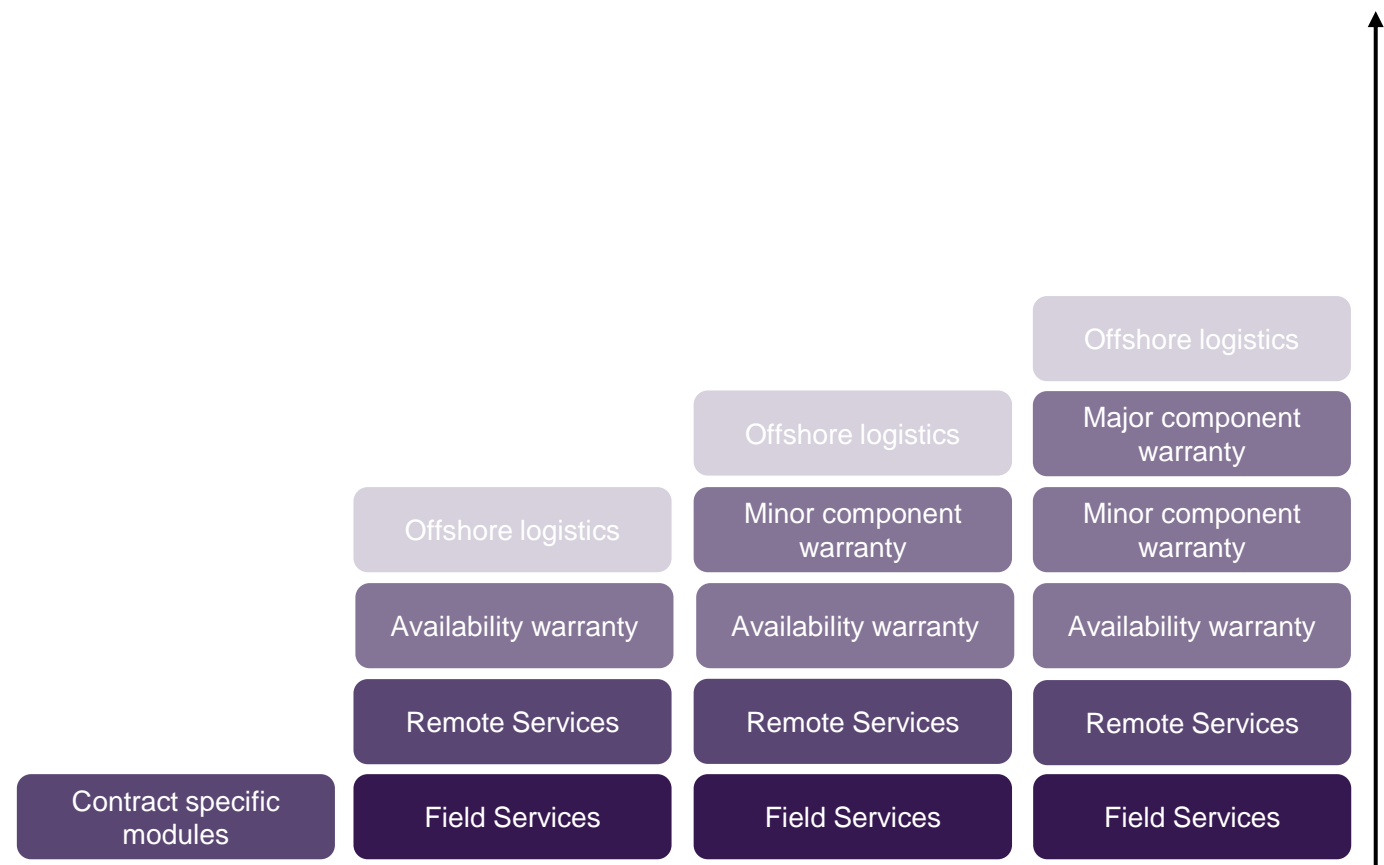

Portfolio covering  
all requirements

Advanced **digital**  
**capabilities**

# Contract what you need

SGRE is committed to providing our customers with flexible, value-driven service plans targeted to their specific operational needs.

We provide a holistic, lifetime-care service through flexibility and experience.

From **technical assistance** to complete asset management. Covering a range of warranty options to mitigate risk and improve operations

SGRE's service programs are also available through individual modules allowing flexible, scalable and robust support

## Nacelle architecture using SGRE proven technologies

**Automatic Lubrication Systems** to increase production time due to fewer turbine stop, as operates while turbine running

Air cooling system to improve maintenance in this location

**Liftra®** solution for all **craneable components** reduces maintenance costs for high towers or remote locations

**Oil exchange tooling** for easier and reduced exchange time

Cutting edge **condition monitoring system (TCM)** supported by more than 12 main sensors

**Hub access** directly from nacelle improves ergonomics and maintenance time

**Transformer room** hanging on the rear structure (low vibrations): metallic cover reduces fire risks

## Siemens Gamesa SG-5X: Proven Success to Reaching New Heights

On the basis of our knowledge, we have improved and maximized the design of Siemens Gamesa 5.X, making it possible to reach new heights:

- Launched in 2019 - 2GW orders before 1st Prototype Running
- 4 GW sold as of today
- Maintenance contract terms from 15 years and ranging up to 35 years
- 1.2GW installed as of 2015, and +2GW of the 5.X sold in Sweden since 2019 until today

# Multibrand Service

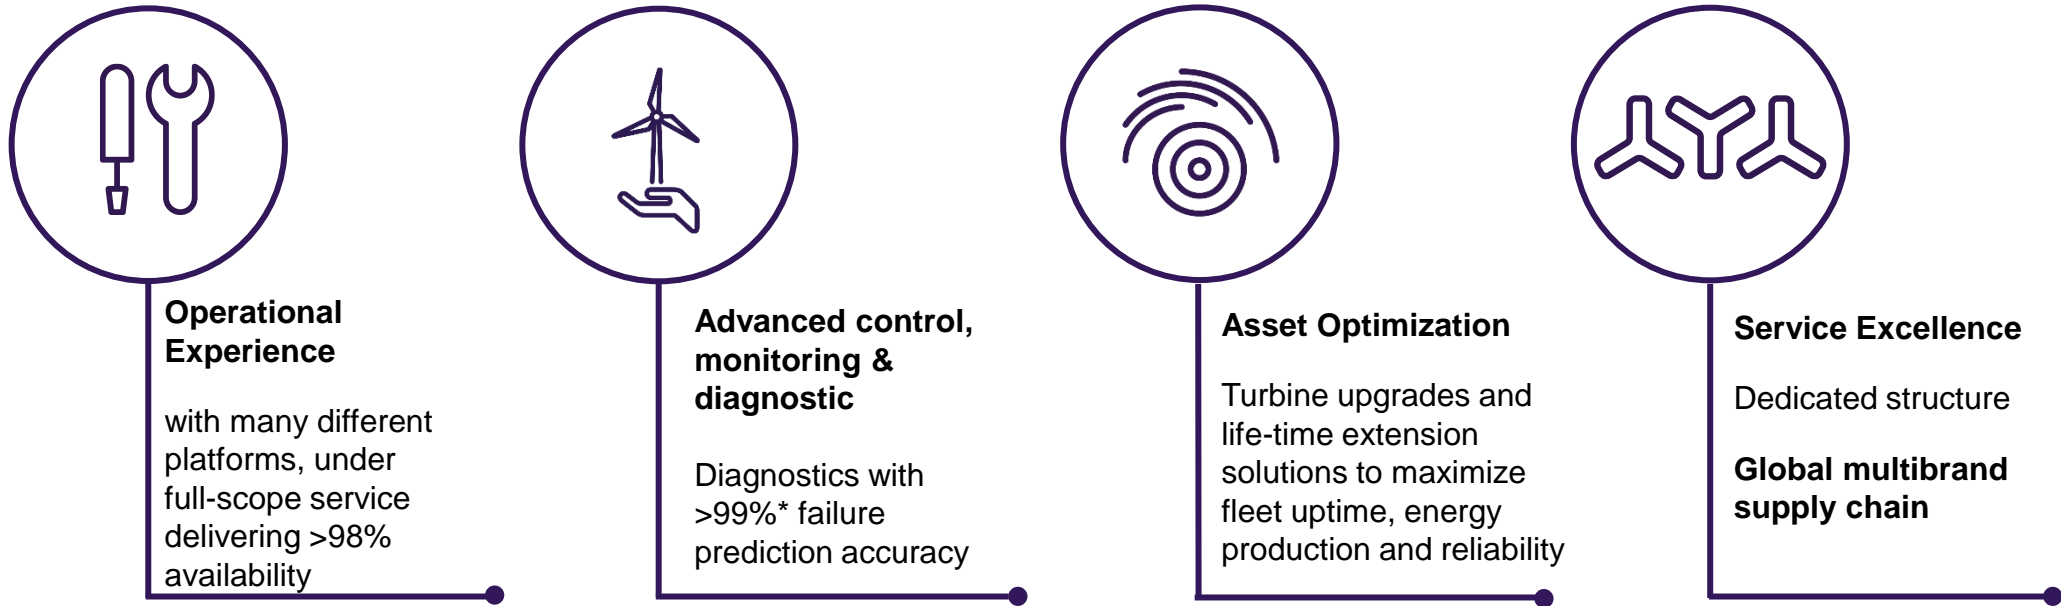

## Our unique DNA of five OEMs, the foundation of our Multibrand Services excellence

Our Multibrand Services cover **30+ different wind turbine models** from manufacturers such as:

- Vestas
- GE
- Nordex
- Senvion
- Suzlon
- Ecotecnica
- Acciona
- and others

# Siemens Gamesa Multibrand services: Supporting your future growth

## Selected successes of Multibrand Services worldwide
